Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. Claims 1-43 are presented for examination.

2. *Election/Restrictions*

1) Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-25, drawn to a digital data computing method comprising simulating asynchronously particulars and transformation particulars, classified in class 709, subclass 246;
- II. Claims 26-43, drawn to a digital data computing method comprising secured coprocessor and a hardware key (claim 30); secured memory which is secured either by hardware or software (claim 32); and asynchronous responses in order to perform allocation and de-allocation of data storages resources (claim 33) particulars, classified in class 709, subclass 226.

3) The inventions are distinct, each from the other because of the following reasons:

Inventions I-II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case: Invention I has separate utility such as it is usable by any system which lacked features of the second group of claims, e.g., a digital data computing method comprising secured coprocessor and a hardware key (claim 30); secured memory which is secured either by hardware or software (claim 32); and asynchronous responses in order to perform allocation and de-allocation of data storages resources (claim 33) particulars, classified in class 709, subclass 226.

The invention II has separate utility such as it is usable by a system which lacked features of group I of claims, e.g., a digital data computing method comprising simulating asynchronously particulars and transformation particulars, classified in class 709, subclass 246. See M.P.E.P. § 806.05(d).

Art Unit: 2142

4. Because these inventions are distinct for the reasons given above and because the search required for each group is different and not co-extensive for examination purpose because these groups would require different searches on PTO's classification class and subclass e.g.

a) the Group I search (1-25) would require use of search classified in Class 709, subclass 246 (which would not required for the Group II);

b) the Group II search (claims 26-43) would require use of search Class 709, subclass 226 (which would not be required for the Group I) therefore restriction for examination purposes as indicated is proper.

5. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mehmet Geckil whose telephone number is (703) 305-9676. The examiner can normally be reached on all days of the week from 6:30 A.M. to 3:00 P.M.
